Positivity Month Recipe

 1 brand

 1 afternoon

100 % fun

At Agile Assets, we're all about making your social media job fun again. Today we want to share our recipe for how to get a whole month of posts created without (!) sacrificing quality. Ready for it? Let's dive in.

Posts Needed

- 1 Say Hi Post
- 2x Teaching Tuesday
- 2 x Wellness Wednesday
- 3 x Gratitude
- 3 x Behind the Scenes
- 4 x Monday Motivation
- 5 x Industry Insight
- 5 x Weekend Wisdom

How to Have Fun with it

1. Of course you can simply dig in.
2. However, being creative can be so much fun, isn't it?
3. And the best thing is: People will notice and feel the difference.
4. Have a good coffee, and make sure you have block focus time (at least for the first brainstorming and selections. Your favorite playlist or DJ set now come in handy. For the next 4 hours, you're a creative animal doing what you do best - enjoy!
5. Sometimes, it is good to get to an 80% level in one stretch, then let it sit for another day, review, and refine. Not to do: Make a break between brainstorming and implementation; this will typically make the process much lengthier.

Real-life tested.*

How to put it together

IN JUST 1 AFTERNOON

*This is the actual process our CEO Kristin uses in her brand agency to successfully create quality campaigns in a minimal amount of time.

1

Brainstorm on those different content types. If you feel 'blank page' block start writing it out. Play with Claude or GPT. At best go for more ideas than you need. Use each a big paper, or do it online on Miro as a remote team.

30'

2

Select the posts that speak to you. If they feel a bit bold, that's good (not risk, yjust bold ;)). Give them a look whether they overall tell one story that feels like your brand.

20'

3

Create. Be efficient about it. Use or create templates for each. Then start filling in. Make sure that at least a third contains something visually appealing.

2 x 60'

4

Bulk upload or one by one upload, then drag + drop to the calendar. For the captions, again, feel free to let Mägic Ed (built in) or an external tool such as Claude help you. Make sure the style sounds like your brand. If you don't have it already, play with the tonality settings in Mägic Ed, find one that fits and sitck with it.

30'

5

Review from afar on the brand overview to make sure the overall story unfolds nicely. Adapt again. Set the posts for the next 1-2 weeks active to autopublish.

RELAX. SPREAD POSITIVITY.
WATCH YOUR BRAND GROW.
